What's Changed and What to Expect Going Forward

On January 28, 2026, we sunset our Marketing Campaigns Usage product. This means you won't see a separate charge on your invoice for Legacy Marketing Campaigns usage going forward. Instead, all campaign mail send usage is now drawn from your Email API Package.

You may have noticed Marketing Campaigns Usage and Contact List Usage charges appear on recent invoices due to a system update. The charges are valid, we've since aligned billing to a single model where Contact Storage is usage based and campaign sends are included in the Email API Package.

If you have stored Marketing Campaign contacts, your Contact List Usage will continue to be charged based on the largest number of contacts stored on any day within a given billing month, in blocks of 10K contacts. If you'd like to reduce your ongoing charges, you can [delete contacts you no longer need](#).
